

Officer Steve Morrissey
Distinguished Performance Award
December 2010

In October 2010 the State of Florida revised the crash report form used to document all traffic crashes in the state. The effective date of the revision was January 2011. Officer Steve Morrissey was assigned to attend a Train the Trainer class on the implementation of the new forms. In addition to developing the training program, Officer Morrissey worked closely with the IT section to update the police department's crash reporting software.

Officer Morrissey then worked with the Traffic Sergeant to develop a schedule to train all personnel who normally handle traffic crash investigation – a total of 118 people. Officer Morrissey conducted the training for all personnel and adjusted his schedule so as not to disrupt any patrol schedules. Officer Morrissey ensured that all affected personnel were trained and the department's software was updated well before the January 2011 date.

Officer Steve Morrissey was recognized with the Distinguished Performance Award for his commitment to duty and performing his assignment with exceptional professionalism.
