

WHAT I LEARNED IN GRADE

What I learned in Grade is drugs can hurt you and also kill you. People who take drugs feel depressed or just have problems in life that they do not know how to deal with without using drugs. What I learned in Grade is that in a gang there are leaders and followers. What I learned is leaders and followers both have their bad sides. I also learned that there are these things called Gateway drugs. These drugs lead to drugs that do more damage to your body and your mind. The most important thing is to just say no. If people ever ask me if I want a cigarette, I will respond proudly NO THANKS!!! This is what I learned in the Grade program and that is why I joined this program
